## PROJECTS EXPERIENCE

### Blog-website 2024- (SEPTEMBER)

- I created a dynamic blog website using Laravel for the backend and React for the frontend. It includes full CRUD operations, allowing users to create, read, update, and delete blog posts efficiently. This setup ensures a seamless and interactive user experience.

### Simple E-commerce Website 2024 - (NOVEMBER)

This project is a simple e-commerce website where users can browse products, add them to a cart, and proceed to checkout. The backend is built with Spring Boot, while the frontend is developed using React. The database is managed using SQL, and API communication is handled through RESTful services.

### Small Personal Notes Application Using Laravel 11 2025- (January)

This is a simple Personal Notes Application built using Laravel 11. It allows users to create, edit, delete, and manage their notes securely. Laravel's built-in authentication, Eloquent ORM, and API capabilities make it a great choice for developing this type of application.
